

daylighting natural light in pdf

Daylighting is the practice of placing windows, skylights, other openings, and reflective surfaces so that sunlight (direct or indirect) can provide effective internal lighting. Particular attention is given to daylighting while designing a building when the aim is to maximize visual comfort or to reduce energy use.

Daylighting - Wikipedia

In urban design and urban planning, daylighting is the redirection of a stream into an above-ground channel. Typically, the rationale behind daylighting is to revert a stream of water to a more natural state, for the purposes of runoff reduction, habitat creation for species in need of it, or for aesthetic purposes.

Award brief Scope. Daylight in architecture is an ever-relevant topic. Daylight has been used for centuries as the primary source of light for the interior and architects have always been interested in and fascinated by daylight; yet daylighting can be a difficult discipline to approach, understand and master.
