

developments in sustainable chemical pdf

Chemical Industry Digest, published by Blockdale Media LLP, is a technical journal oriented towards engineers and decision makers in all chemical & process.

Chemical Industry Digest

1. Introduction. The integration of environmental and social aspects with economic considerations, known as the triple-bottom-line (TBL) dimensions of organizational sustainability (Elkington, 1998, Elkington, 2004), has continuously gained relevance for managerial decision making in general and for supply chain management (SCM) (Carter & Rogers, 2008) and operations management (Drake and ...

Quantitative models for sustainable supply chain

Sustainable development is the organizing principle for meeting human development goals while at the same time sustaining the ability of natural systems to provide the natural resources and ecosystem services upon which the economy and society depend. The desired result is a state of society where living conditions and resource use continue to meet human needs without undermining the integrity ...

Green chemistry, also called sustainable chemistry, is an area of chemistry and chemical engineering focused on the designing of products and processes that minimize the use and generation of hazardous substances. Whereas environmental chemistry focuses on the effects of polluting chemicals on nature, green chemistry focuses on the environmental impact of chemistry, including technological ...

Desalination, like other major industrial processes, has environmental impacts that must be understood and mitigated. A new report from the Pacific Institute examines effects on the marine environment associated with the construction and long-term operation of seawater desalination plants, including withdrawing water from the ocean and discharging the highly concentrated brine.

2| Solar Fuels and Artificial Photosynthesis Foreword The Netherlands consumes almost 18 billion litres of fossil fuels per year. That produces a vast amount of CO₂, a greenhouse gas that is known to contribute to climate warming. In order to limit climate warming, we will have to recycle CO₂ which can only be achieved with fuel. The
