disaster recovery and business pdf

Disaster recovery involves a set of policies, tools and procedures to enable the recovery or continuation of vital technology infrastructure and systems following a natural or human-induced disaster. Disaster recovery focuses on the IT or technology systems supporting critical business functions, as opposed to business continuity, which involves keeping all essential aspects of a business ...

Disaster recovery - Wikipedia

Disaster recovery (DR) and business continuity refers to an organization's ability to recover from a disaster and/or unexpected event and resume operations. Organizations often have a plan in place (usually referred to as a "Disaster Recovery Plan" or "Business Continuity Plan") that outlines how a recovery will be accomplished. The key to successful disaster recovery is to have a plan ...

OFB-EZ – Business Continuity Planning - IBHS

Why is disaster recovery planning important in health care? Due to the nature of their business, health care organizations -- especially hospitals -- must maintain a high degree of system and network availability. Patients' lives may depend on systems being up and running, and patients' health could be jeopardized by lack of access to health care data in the event of system downtime.

FAQ: Disaster recovery planning for health care data
