

educational psychology study guide pdf

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning.

Effective Learning Techniques: Promising © The Author(s)

Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, beliefs, and habits. Educational methods include storytelling, discussion, teaching, training, and directed research. Education frequently takes place under the guidance of educators, but learners may also educate themselves. Education can take place in formal or informal settings and any ...

Educational Psychology Interactive: Readings in

There is much discussion about what young people should do in their childhood and youth to prepare them for success in adulthood. Once the desired end results or the prerequisites for success have determined, it is necessary to determine the means or the conditions by which those can be brought about.
